

Explore Science Reference Center

- **Go** to infohio.org and choose all.
- **Click** on Science Reference Center (You will need a user name and password for home access to Science Reference Center)
- **Choose** one of the categories and then a subcategory to browse. Find an article that interests you. (Example: Earth Sciences > Earthquakes> Results list includes books, magazines, and more)
- **Browse** the Popular Sources. These are eBooks that students can read and use for research. **Click** on *Grasslands* to browse one of the eBooks. Check out how to “Create a Grassland” in your home and classroom on page 30.
- **Look** at the Featured Science Topic. You can view the sections as HTML or PDF text.
- Reference Shelf features helps resources for students and teachers. **Look** at the Lesson Plans and find a lesson that is helpful to your classroom. **Check out** the Science Experiments like [Inquiry: Beaches on the Move!](#) that helps students understand how sand dunes are created. It includes an experiment on how to protect sand dunes. Permalink:
